

# IP-350

---

## PARKING BARRIER GATE

The IP 350 provides access control for all lane requirements. The IP350 barrier gate is designed to be a high-quality device which will deliver years of performance with low maintenance costs.

The IP 350 can be equipped with an LPR camera which is integrated into the barrier housing. An LED red and green light system can be added to the barrier housing or its gate arm. If desired, both the housing and gate arm can be fitted with LED light

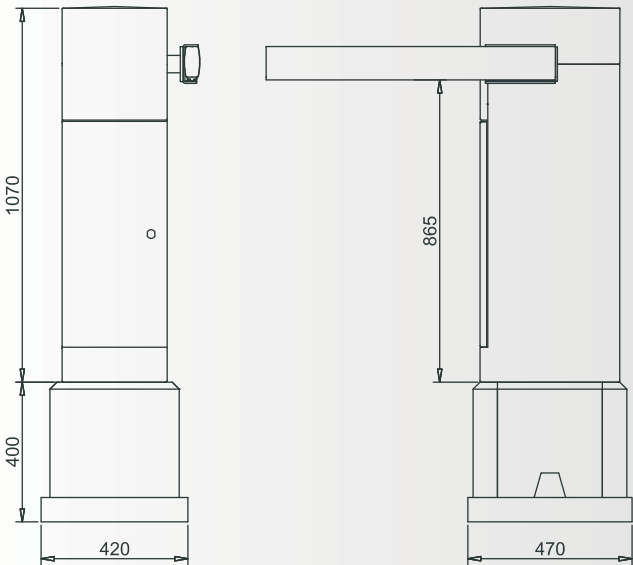

STANDARD

- Aluminum arm
