

FirmBase

- Web portal for companies or departments
- Share parking spaces easily
- Manage your own employees and guests
- Ticket or Ticketless
- Intercom fully integrated

What is FirmBase?

FirmBase is a portal that allows companies or departments to manage their own parking spaces for their employees and guests.

How to use FirmBase?

- Create, change and block access for employees. Employees can easily drive in and out with license plate and license plates can be changed in FirmBase.
- Guests can be registered in advance so that they can get access via license plate or access code.
- Unregistered guests can select company or department defined intercom buttons on the touchscreen entrance to get contact. Access can be granted by the company or department.
- Configure VIP's so they will always have access.
- Various individual counters are available to count VIP's, employees and guests.
- Flexible pools can be used to share parking spaces between companies or departments.
- Reports are available to check availability, transactions and notifications.
- Export invoice data for companies or departments.

Employee / VIP

Hi, I'm an employee.

When parking space is available, the barrier opens automatically because the license plate is recognized. If the license plate is not recognized, the employee presents a token/subscriber card. The company/department's counter is updated when driving in and out.

Company 2	14

Hi, I'm a shareholder.

The barrier opens automatically because the license plate is recognized. Because the shareholder is registered as a VIP in the system, there is always parking space available. The company/department's counter is updated when driving in and out.

Registered guest

Hi, I'm a customer.

The barrier opens automatically on arrival because the license plate is registered. If the license plate is not recognized, the customer can enter an access code on the touchscreen. The company/department's counter is updated when driving in and out.

Unregistered guest

Hi, I'm a visitor.

The visitor pushes the company/department's intercom button at the touchscreen on arrival. The operator opens the barrier and the company/department's counter is updated. The barrier opens automatically at the exit and the company/department's counter is updated again.

Hi, I'm a supplier.

The supplier will take a short term parking ticket on arrival and the barrier opens. The supplier signs in at the company/departments desk, where the ticket is recorded for free parking. The barrier opens automatically at the exit and the company/department's counter is updated again.
